

University of Warsaw – Education

The University of Warsaw is the largest university in Poland when it comes to the number of students. Each year 42 500 undergraduate and graduate students, 2 900 doctoral students and 2 700 postgraduate students are educated here. The overall number of students and doctoral students at the university includes 4 900 international students, half of whom study on long-term programmes. The other half comprises participants in academic exchange programmes, such as Erasmus+. Most of our international students come from Belarus, China, France, Germany, Italy, Spain, Turkey and Ukraine.

Study programmes are offered by 21 faculties, 4 doctoral schools, interdisciplinary units, and academic and research centres. 3 700 staff, including 690 professors, teach our students. The wide range of study options cover programmes in the humanities, and the social, exact and natural sciences. There are also individual interdisciplinary studies, 27 English-language programmes and 29 programmes of study run jointly with universities from abroad. In addition, the Open University, which makes courses available to everyone, is based at the University of Warsaw.

The university performs well in various university rankings, both nationally and internationally. According to global rankings, UW is among the top 3% of universities in the world. Each year, approximately 20 programmes provided by the University of Warsaw are listed in the international rankings by subject, such as the QS World University Rankings, the Eduniversal Best Masters and MBA Ranking. In the Shanghai Ranking of Academic Subjects 2019, Physics and Mathematics, run by UW, were ranked 51-75 worldwide.

The University of Warsaw was the first Polish university to begin monitoring the careers of its graduates. The results of this monitoring indicate that over 90% of respondents find employment within a year of obtaining a degree.

The university works together with many international institutions, not only in terms of academic exchange programmes but also on joint didactic projects. In cooperation with Columbia University in New York, UW has formulated a one-year programme of excellence for future teachers. The university, in collaboration with the University of Cambridge, runs a programme which brings together Polish language, literature and culture at the British university. The university belongs to the 4EU+ European University Alliance selected by the European Commission for funding in the 'European Universities' call for proposals, launched as part of the 2019 Erasmus+ programme. The 4EU+ universities want to enhance cooperation in research, teaching and initiatives related to the social responsibilities of science. 4EU+ students take part in summer schools, workshops and seminar. 4EU+ plans to create programmes of study offering students and doctoral students new mobility opportunities.

Approximately 200 student and doctoral student associations, both academic and artistic, exist at the university. Several thousand people are involved in them. The university supports those students who want to develop their skills and gain experience while competing against students from other leading world universities. Representatives from the university perform well in international competitions, including the ACM International Collegiate Programming Contest, law competitions, the University Rover Challenge and the International Physicists Tournament.

Currently, UW is implementing two large initiatives: a multiannual development plan (2016-2025) which will provide students of humanities and social sciences with excellent study conditions, and a comprehensive growth plan whose aim is to upgrade the range of studies at UW to make them even more attractive.
